InDesign
Blender
Angular
Git
WordPress
WCAG Accessibility

Soft Skills

Collaboration
Facilitation
Teaching
Storytelling

Languages

English (native)
Spanish (beginner)
Swahili (intermediate)

Industry Experience

Senior User Experience Designer | Fidelity Investments

Jersey City, NJ | May 2023 – Present

- Designing end-to-end digital experiences in two streams: a product suite that helps customers understand and pay down student debt, and a public-facing financial education stream of marketing pages, article templates, and reusable components.
- Building and maintaining design system components in Figma; partnering with engineering on token implementation and ensuring consistency across products.
- Creating coded prototypes in HTML, CSS, TypeScript, and Angular for user research and A/B testing, including a sign-up flow redesign that more than doubled the active user base and a modular sales demo that increased client sign-ups by 80.1%.
- Ensuring all elements and interactions meet WCAG accessibility guidelines.

Graphic Designer | National Peace Corps Association

Remote | Nov 2020 – Aug 2021

- Created and managed the organization's web pages, with a UX lens, and using HTML, CSS, and javascript and a CMS (silkstart).
- Supported a network of more than 100 Peace Corps affiliate non-profits, designing within the constraints of the shared Silkstart CMS platform that NPCA provided.
- Translated stories into visual narratives and created interactive reports, webpages, social media graphics, and more.

Frontend Developer | Lemans Corporation

Madison, WI | Dec 2018 – Aug 2019

- Used javascript, typescript, Angular 2, and HTML/CSS to design and develop components for an e-commerce website within a corporate agile team.

Math and Computer Teacher | Peace Corps

Manyara, Tanzania | Jul 2016 – Oct 2018

- Taught 40 hours per week in combination Swahili/English from the Tanzanian math and Information and Communication Technology (ICT) curriculum to class sizes of up to 75 students.
- Oversaw project design and implementation of a grant giving 40 teachers and more than 1000 students training on sexual health and gender equity. Also all 600 female students received menstrual hygiene kits.
- Improved the school computer lab with a 400% increase in computers, a new projector, and an overhaul to the ICT curriculum through another initiative.

Academic Experience

Adjunct Professor | University of North Carolina

Chapel Hill, NC | Jan 2024 – Dec 2024

- Led classroom discussions on design, culture, and technology. Planned and wrote syllabi for engaging lessons about graphic and experience design.
- Taught students how to use Figma, Adobe software, creative coding tools (Processing), AI, and more.

Graduate Research Assistant | NC State University

Raleigh, NC | Aug 2021 – May 2023

- Created three VR and web products as part of a National Science Foundation-funded research project.
- Conducted qualitative user research and A/B testing.
- Contributed to three published papers as a co-author and one published paper as lead author. Presented that paper at IASDR 2023 in Milan, Italy.
